

Mushroom  
SS 207

Tan  
SS 203

*Naturally Tough*

*Timber Pro UV*

High Performance Specialty Wood Coatings™

*Semi Solid Stains (SS Series)*

This color series contains the highest amounts of pigments. Two coats will usually cover the original wood while still allowing some grain and texture to show.

Barnboard SS 202	Oxford Brown SS 204	Silver Gray SS 214	Moss Green SS 205	Avocado SS 206
Burgundy SS 233	Heritage Blue SS 240	Forest Green SS 260	Hunter Green SS 268	Cape Cod Gray SS 222
Silver Birch SS 201	Navy Blue SS 242			

*Liquid Samples Available!*

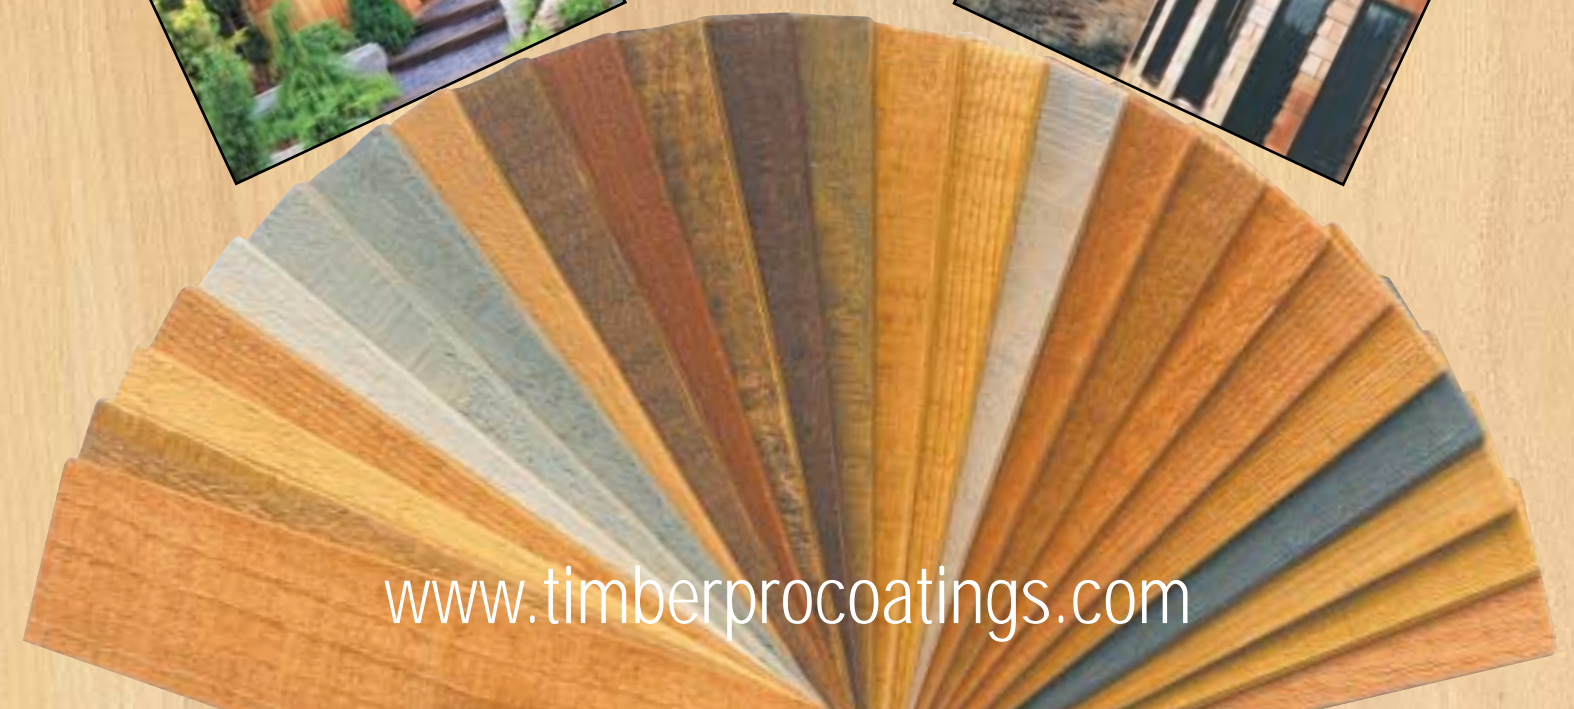

Liquid samples of all colors may be ordered, and we encourage you to do liquid brush outs on your wood species to test color before ordering final product.

# Transparent Stains (TR Series) "Our Top Sellers"

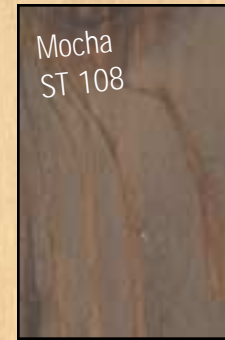

**Clear UV**  
"No Tint"

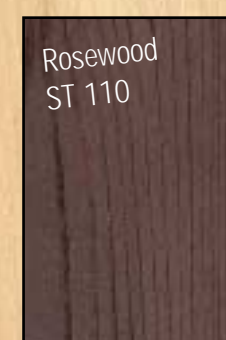

Use as a Top coat over stains for extra protection or alone as a sealer with limited sunscreen.

## Transparent Series (TR)

For those desiring the true, clear natural wood look... These sheer transparent shades let the wood grain, knots, and texture show through. They contain a hint of pigment to enhance the sunscreen additives that prevent graying & sun fading.

# Semi Transparent Stains (ST Series)

## Semi-Transparent Series (ST)

These stain colors contain more pigment, but still show a trace of the original wood color as well as the grain and texture of wood.

"Colors represent 2 coats brushed on cedar wood". True color is affected by species, texture and porosity of wood...

All color samples are digitized approximations. Brush out samples on your wood species is recommended before ordering
