- Siding
- Log Homes
- Hot Tubs
- Shingles
- Shake Roofs
- Outdoor Furniture
- Fences
- Planters
- Saunas
- Arbors
- Gazebos

Timber Pro UV Log & Siding Formula is a professional grade finish to stain, seal, and protect all your natural wood surfaces. Log & Siding Formula is formulated with durable, penetrating oil resins that are carried in pure water. This formula gives you the toughness of an oil finish combined with the envirosafe qualities and easy cleanup of a water-borne product. Our oil resins fill the pores of the wood and lock in the natural resins already present. Once our resins cure, water that lands on the wood surface cannot penetrate. The wood becomes more dense and non-absorbent, much like the resin-filled heartwood knot of a tree. Log & Siding Formula protects your wood from the inside.

Environmental safety is important when choosing a finish to apply to the wood surfaces in and around your home. Our Log & Siding Formula does not contain the toxic solvents that are found in many wood finishes. As Log & Siding Formula dries and cures, the only substance evaporating into the air is water vapor. You can feel confident that you and your loved ones will not be exposed to toxic fumes and chemicals if you use Timber Pro UV Log & Siding Formula.

Log & Siding Formula contains multiple UV reflectors and absorbers to prevent the fading and deterioration caused by the sun. These additives work in conjunction with our micro-transoxide tints, utilizing the latest in technology to give you superior UV protection. Low-toxicity mildewcides and algaecides protect against the mold and mildew growth that is a common problem in wetter climates.

Available in 5 standard colors and over 40 custom colors, you are certain to find a shade of Log & Siding Formula stain to suit your tastes. If you want your wood to weather naturally to gray, our Clear UV formula will preserve the wood without affecting the color.

ADVANTAGES:

- Beautiful, natural-looking finish available in your choice of colors
- Easy application, cleanup, and maintenance
- Finish does not need to be stripped before reapplication
- Envirosafe formula has no unpleasant fumes, will not harm children, pets, or plants
- Hard-drying, penetrating formula protects wood from the inside
- Finish will not attract dirt and turn black as it ages
- Prevents rot and mildew growth
